Driller's Dust Bowl solves the problem of making a mess while drilling large diameter holes in ceiling for the installation of a recessed light fixture, eliminating the need for face masks, goggles, drop cloths or vacuuming. The tool accessory easily fits between a drill's chuck and cutting tool. It forms a seal to the surface of the material being worked on and collapses like a plunger to allow the user to perform the task while encapsulating all the debris created by the process. It works with a wide variety of drill bits, other cutting tools, and all sizes of hole saws.

- Works with tools you already have
- No ceiling marks
- Stops you from punching through once hole is cut
